## Professional experience

Dates  
Name of employer  
Occupation or position held  
Main activities and responsibilities

05-2016 onwards  
University of Vienna, Department of Economic Sociology, AT  
Assistant Professor post doc  
EU-FP7 project Cultural Pathways to Economic Self-Sufficiency and Entrepreneurship: Family Values and Youth Unemployment in Europe (CUPESSSE)  
Soziale Hintergründe und Auswirkungen von Jugendarbeitslosigkeit in Wien (2014-2018)  
Teaching courses in labour market sociology

Dates  
Name of employer  
Occupation or position held  
Main activities and responsibilities

05-2004 onwards  
Institute for Advanced Studies (IHS), Department of Sociology, AT  
Senior Researcher, Project Manager  
More than 8 years of professional experience in managing and conducting of applied and basic research, communication of results both to scientific community (conference talks and publications) and clients; research in education and training, focus on social stratification and mobility, labour market outcomes of education and its institutional determinants, transition from school to work, funding and governance of education; member of the national coordinating team of the European Social Survey in Austria

## Education and training

04-2009 to 07-2015  
Title of qualification awarded  
Principal subjects/Occupational skills covered

Doctoral Studies in Sociology  
Doctor phil. (with distinction)  
Comparative institutional analysis of education, training and employment. Dissertation: *"The Impact of Vocational Specificity, Quality and Stratification of Educational Systems on the Labour Market Outcomes of Education and Training"*  
University of Vienna, Department of Sociology

Name and type of organization providing education and training  
10-1994 to 06-2002

Title of qualification awarded  
Principal subjects/Occupational skills covered

Studies in Sociology  
Magister rer. soc. sec. (equivalent to Master's degree)  
Empirical social research (qualitative and quantitative methods), sociology of labour, youth, education, media, etc.

Name and type of organization providing education and training

University of Vienna, Department of Sociology

## Methodological skills and competences

QMSS2 Summer School: "Analysis methods for cross-national comparisons" University of Leuven, Belgium August 28 – September 4 2011: Structural Equation Modelling, Multilevel analysis, Latent class analysis.

Competencies acquired through several post-graduate courses and lectures at the IHS (methodological and theoretical) and during on-the-job training: regression analysis, random coefficient models, structural equation modelling, cluster analysis, multilevel analysis, event history modelling, matching techniques, causal inference, analysis of complex samples like the international large scale assessments of student performance (PISA, PIRLS, TIMSS) and adult skills (PIAAC).

Award

2008 Austrian Vocational Education and Training Research Award (1. Price for the Paper Returns to Education and Training in Austria, EUR 1,500)

Programming Languages

R, SPSS, Mplus, MLwiN, STATA, LaTeX.

Professional activities

Österreichische Gesellschaft für Soziologie: member; organiser of the ad-hoc panel on "Youth and Young Adults on the Austrian Labour Market", ÖGS Kongress, University of Innsbruck, October 1-3, 2015 (together with Nadia Steiber).

Österreichische Gesellschaft für Forschung und Entwicklung im Bildungswesen: member; organizing partner and reviewer of contributions to the Vocational Training Research Conference 2016 in Steyr.

Research Committee on Social Stratification and Mobility (RC28) of the International Sociological Association (ISA): member.

Reviewer

Österreichische Zeitschrift für Soziologie

Zeitschrift für Soziologie

Journal of Vocational Education & Training

### Third-party funds acquired

#### Funding / Client and Date

Anniversary Fund of the  
Oesterreichische Nationalbank  
(OeNB)  
12-2016 to 03-2019  
EUR 115,000

Federal Ministry of Labour,  
Social Affairs and Consumer  
Protection  
01-2017 to 12-2017  
EUR 35,000

Anniversary Fund of the  
Oesterreichische Nationalbank  
(OeNB)  
07-2014 to 12-2015  
EUR 83,000

#### Title and brief description

**Labor market integration of migrants in Austria (LIMA)** Austria has developed into an immigration country and can be considered as one of the long-standing European immigration countries. Nonetheless, very little is known about the integration of past and recent waves of immigration in the Austrian labor market. The proposed study aims to fill this knowledge gap by providing comprehensive and reliable evidence about the labor market situation of different groups of migrants over time, by analyzing labor market flows and comparing the labor market integration of different waves and groups of immigrants against the contextual backdrop of overall socioeconomic and employment conditions (labor demand), and the evolution of individual background characteristics of the workforce as a whole.

**Activity and inactivity of migrant workers in Austria** Co-funding to the aforementioned OeNB-project to specifically analyse inequalities in labour market participation among migrant workers according to gender and nationality of origin.

**The effects of education, skills and motivation on the status attainment process: An international model.** The study extends the conventional status attainment model by including information on educational careers, learning motivation and adult skills. In order to bring in the cross-country perspective in the status attainment process, the aim is to develop a two-level model and regress social status on both individual- and country-level variables simultaneously. The study employs the OECD survey on adult skills (Programme for the International Assessment of Adult Competencies, PIAAC).

Austrian PIAAC consortium  
10-2013 to 09-2014

Development of the Austrian  
School System (BIFIE)  
10-2014 to 06-2015

EUROSTAT  
03-2014 to 02-2015

**Skill mismatch and vocational specificity.** Using the OECD survey on adult skills (Programme for the International Assessment of Adult Competencies, PIAAC), an objective measure of skill mismatch based on the measured skills and the job requirements as measured by PIAAC assessment and background questionnaire is developed. This measure is then used as a dependent variable to analyze the extent of skill mismatch and as an independent variable to explain differences in occupational status, income, and job satisfaction. Within a multilevel framework, explanatory variables are used at both the worker level and at the educational programme level. At the programme level, a measure of skill specificity is employed in order to assess its impact on the respective outcomes.

Volume on statistical indicators for the **National Education Report Austria 2012.** This study provides a comprehensive set of indicators which presents the provision and performance of the Austrian education system based on a detailed framework, comprising the different stages of implementation (input-process-output-outcome and context) and the policy priorities (employability - matching of supply and demand - accessibility). Specific performance dimensions specify the priorities (competences - structural employment dimensions - target groups).

**Evaluation of measures of the Active labour market programme of the Territorial Employment Pact Tirol** in Tirol. Analysis of participation and labour market outcomes of participation according to the type of measure, both by a quantitative and qualitative approach.

**Job Polarisation on the Austrian Labour Market** Drawing on recent studies that find evidence for job polarisation in Western European countries between 1993 and 2010, including Austria, the aim of this study is to scrutinise the plausibility of the polarisation hypothesis for the Austrian labour market. We use an alternative classification of occupations based on the empirical wage structure observed in Austria. Findings are discussed within the frameworks of skill-biased and routine-biased technological change.

**Is there a shortage of skilled labour in Austria? An analysis based on economic indicators of scarcity.** The project aims to provide information on shortages employing a comprehensive set of indicators to monitor changes in the labour demand-supply relation over the time period 2005 to 2010. At the occupational group level (2-digits ISCO groups) the indicators comprise average hourly wages, average working time, total working time demanded, employment and unemployment, and qualification mismatches.

**Preparing the Country Background Report Austria for the OECD Review of Policies to Improve the Effectiveness of Resource Use in Schools.** The aim of this project is to provide in-depth analysis of context, key factors and policy responses of the distribution, utilisation and management of resources in Austrian schools. An important part of the Review consists of collecting information on approaches to improve the effectiveness of resource use in schools, the challenges of implementation and the evidence of their impact.

**Preparation of a report on progress in the post-Bologna Process: Data collection and computation of indicators.** The overall objective of the project is to meet the demand expressed by the ministers responsible for higher education in the 47 countries of the European Higher Education Area (EHEA), who asked Eurostat, Eurydice and Eurostudent to report on the progress in the implementation of the Bologna Process reforms and the "Mobility for better learning" strategy. Thus, the project aims to collect data and compute indicators covering all Bologna countries in order to provide an adequate response to the said demand.

<p>European Centre for the Development of Vocational Training (CEDEFOP) 02-2014 to 11-2014</p>	<p><b>The role of VET in reducing early leaving from education and training.</b> The focus of this assignment is to gain a better understanding of the phenomenon of early leaving from education and training and VET through analysing existing international datasets which contain data on individuals' pathways in order to assess the scale of early leaving from VET; as a project partner, national data of Germany and Austria are analysed as well as interviews with a range of actors on the factors affecting early leaving in VET and case studies are carried out in these countries; This analysis is complemented by a mapping of policy measures to prevent or address ELET.</p>
<p>Austrian Council for Research and Technology Development (AIT) 12-2012 to 09-2013</p>	<p><b>Vision Austria 2050.</b> The study is about the impact of various sectors on innovativeness in Austria. Within the study, I analyze the relationship between early childhood education (ECE) and educational outcomes in primary and secondary education, as measured by the Large Scale Assessment Studies of student performance in Austria (TIMSS, PIRLS, PISA). A cross-country comparison of performance differences according to ECE attendance with respect to the duration of attendance and ECE quality as well as innovativeness is performed.</p>
<p>Territorial Employment Pact Tirol 12-2012 to 08-2013</p>	<p><b>Not in Education, Employment or Training (NEET).</b> The situation of Youth in Tirol. This study analyses the various transitional pathways following compulsory schooling in Tirol, with a special focus on NEETs. Two youth cohorts are selected and analyzed within a comprehensive framework using administrative data (educations statistics, labor market data, unemployment statistics) as well as survey data (Austrian Labor Force Survey).</p>
<p>Viennese Labour Chamber 06-2010 to 5-2011</p>	<p>Study on <b>financing, participation and strategies in adult and further education and training in Austria</b> and in selected countries. an empirical account of the state and development of further learning in the selected countries is provided. The three aspects of financing, public support, and participation are observed and discussed on the background of the existing conceptual hegemony of the market approach.</p>
<p>Ministry of Education, Arts and Culture (BMUKK) 06-2008 to 05-2009</p>	<p>National Expert of the Vocational field "Electrician (Craft)" in project <b>Feasibility Study: International Large-Scale Assessment for Vocational Education and Training (VET-LSA)</b>. VET-LSA is a concept for an international comparative study of young adults competencies developed in vocational education and training. The purpose of VET-LSA is to investigate the ways in which young adults are prepared for the world of work in different vocational tracks in Europe. The aim of the survey is to provide insights into the strengths and weaknesses of VET-programmes in different occupational fields as an opportunity for different countries to learn from each other. VET-LSA will assess the level and distribution of young adults' vocational competencies in a coherent and consistent way in selected European countries (Austria, Denmark, Finland, Germany, Norway, Slovenia, Sweden and Switzerland).</p>
<p>European Centre for the Development of Vocational Training (CEDEFOP) 2005 onwards</p>	<p>Member of the Austrian ReferNet-Consortium <b>ReferNet: the European network of reference and expertise in VET</b>. Co-Author of National VET policy report and National VET research report. These national reports contribute significantly to Cedefop's research and policy reports (see Cedefop's Publications). The National VET policy report will be used for Cedefop's policy synthesis and comparative work (in 2010) and the National research reports will be used for Cedefop's overview of research in Europe (in 2009 and 2011).</p>
<p>Vienna Employment Promotion Fund (waff) and Viennese Labour Chamber 11-2007 to 08-2009</p>	<p><b>Location factor qualification.</b> Labour supply and its specific qualification is a crucial location factor for the economic area in the Vienna Region. The projects analysed recent changes in labour supply due to demographic, socio-economic and educational trends and forecasted further developments of labour supply and skill needs for the short and medium term.</p>
<p>Viennese Labour Chamber 06-2008 to 10-2008</p>	<p><b>Expenditure for lifelong learning in Austria and trends in further learning participation.</b> The project aimed compiling a comprehensive and systematic statistic of public and private expenditure on further education in Austria. Moreover, patterns and determinants of participation were analysed as well as recent developments.</p>

### **Governance, achievement and selectivity of schools – Results from PISA 2006.**

In this study, the PISA 2006 data is utilised to assess the functioning and efficiency of school governance systems. Our main research question has been, whether the governance mechanisms of schools are utilised to optimise the selection procedure. A second question has been, to which degree the „inputs“ given by the developmental benefits of good background conditions are influencing the achievement, compared to the governance variables. A third question is as to how the governance variables are related to students' background and achievement in more comprehensive systems. The analysis is based on two-level linear modelling.

### **Selected talks given**

- 2016 Lassnigg, L & S. Vogtenhuber: Tracking, vocational education (VET) and the quality-inequality nexus – results about policy choices in structures of skills formation. Paper presented at the Third PIAAC International Conference, Madrid, November 6-8, 2016.
- 2016 Vogtenhuber, S.: Der Einfluss von Bildungsabschlüssen und Kompetenzen auf die berufliche Position junger Erwachsener. Paper presented at the 4. GEBF-Tagung, Frei Universität Berlin, March 9-11, 2016.
- 2015 Vogtenhuber, S.: Der Effekt von Bildungsabschlüssen und Kompetenzen auf die beruflichen Positionen junger Erwachsener. Paper presented at the Österreichischer Soziologie Kongress, University of Innsbruck, October 1-3, 2015.
